Leather Garments and Goods

# INTRODUCTION

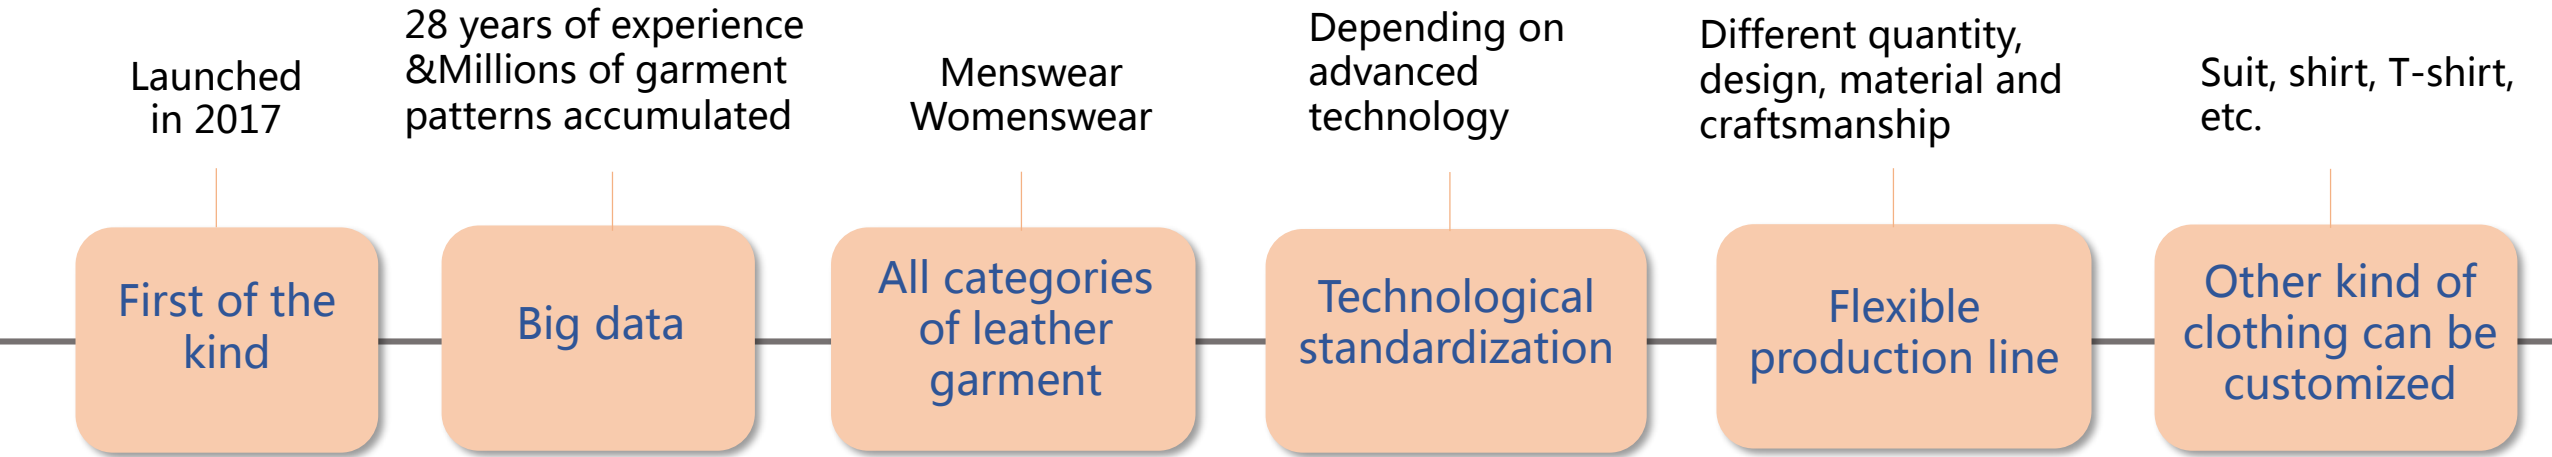

With 28 years of experience in leather manufacturing industry, Dalian Longsheng Fashion Co., Ltd has developed the World' s First Intelligent Manufacturing Platform supported with big data and transformed itself into a pioneer in the intelligent manufacturing field in 2017.

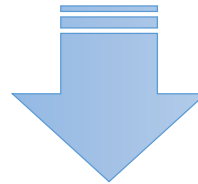

Dalian Longsheng' s design and manufacture process for leather garments has always been eco-friendly. As the biggest leather garments supplier for Europe, Dalian Longsheng has put its professional experience and millions of garment patterns accumulated over time into use and developed an intelligent manufacturing platform. The flexible manufacturing system (FMS) supported with big data and advanced technology combines traditional production line with information technology and brings them to a whole new level by reorganizing the pre-existing mass production lines. And FMS' s digital process is capable of meeting various individual needs in terms of quantity, design, material and craftsmanship with its mixed-model production line. Therefor we can take custom made orders, mixed orders and small batch orders with our flexible manufacturing system and deliver in 7 business days. Our clients enjoy the benefits of "0 stock, quick delivery, and excellent cost performance" .

By linking taking orders, supply chain, production and service, Longsheng' s intelligent manufacturing platform adopts intelligence process combined with digital technology and information technology. It is a smart industry chain from top to bottom, which meets the individual demands from business and individual customers from all over the world with products of superior quality.

# INTRODUCTION

**What can we do for customer ?**

# INTRODUCTION

# B customer + C customer

**B2M**

( Flexible production line )

**C2M**

( Custom Made )
